

Internships

Tenaska offers internships, as well as opportunities for recent graduates seeking full-time employment. Tenaska is committed to attracting and developing outstanding talent. It provides a challenging and rewarding work environment for students and young professionals wanting to build skills and experience.

Tenaska internships for college students offer real-world work experience with our diverse energy teams, finding innovative ways to solve problems and respond to opportunities in the energy sector.

Tenaska interns:

- Have meaningful day-to-day assignments and project responsibilities
- Develop an understanding of complex energy projects from engineering, financial and multidisciplinary perspectives while influencing company projects
- Have the opportunity to interact with senior executives to present project findings and discuss challenges.
- Network with other interns and employees from all departments
- Engage in professional development training sessions

Interns apply the knowledge and skills learned in the classroom and gain experience that will benefit them in a challenging job market. To find out more about Tenaska internships, click [here](#).
