

Gregory B. Kelly

President, Energy Solutions

AS PRESIDENT OF TENASKA ENERGY SOLUTIONS, GREG KELLY IS RESPONSIBLE for all activities for the company's newest initiative, providing integrated energy solutions to wholesale and retail customers, while leveraging Tenaska's existing generating assets and service capabilities, including energy management and development. He is a member of Tenaska's Board of Stakeholders.

Mr. Kelly provides leadership in customer acquisition, product development, and execution of origination. He provides business guidance to various Tenaska teams, including TPS, legal, engineering and SD&A, during the acquisition phase of transactions.

Mr. Kelly's expertise includes energy facility business development, operations and maintenance, construction management, financing and energy trading. Before joining Tenaska in 2011, he led origination teams for TXU Energy and Calpine Corporation, where he was responsible for the forward contracting leading to more than 2,500 megawatts of power generation facility construction. He has held leadership positions in development and origination with PG&E National Energy Group and led the global sales team for a leading manufacturer of thin-film photovoltaic modules.

He earned a Bachelor of Science in mechanical engineering from Georgia Institute of Technology.
