

Ben M. Hochstein
President, Tenaska Generation

As President of Tenaska Generation, Ben M. Hochstein oversees the Tenaska-owned generation fleet, which consists of eight natural gas plants, two wind farms and two solar plants and generates a combined 7,580 megawatts of power. He is a member of Tenaska's Executive Leadership Board.

In his current role, Mr. Hochstein leads the team that operates and manages one of the safest, most reliable fleets in the U.S. The Tenaska fleet is recognized each year by the National Safety Council for its safe operations and is known for its community support.

Mr. Hochstein's responsibilities for the fleet include value creation for Tenaska and its customers, partners and lenders, through revenue enhancement and asset optimization; cost control; corporate and plant operations; risk management; compliance; budgeting; and administration.

Prior to his current role, Mr. Hochstein served as Vice President and Corporate Controller responsible for accounting, budgeting and financial reporting for Tenaska, Inc., and all of its plant partnerships. Mr. Hochstein also has an extensive background in financial analysis, projections, and planning; debt and equity financings; and development, acquisition, and monetization activities for Tenaska projects.

Before joining Tenaska in 2012, Mr. Hochstein worked as a Certified Public Accountant in the Audit Division at Deloitte & Touche.
